

EDUCATION

Year	Degree/Exam	Institute	CGPA/Marks
2027	M.TECH Dual Degree 5Y	IIT Kharagpur	5.89 / 10
2021	HSC	Swa. Bhaskarrao Shingne High School	82.33%
2019	CBSE	Sahakar Vidya Mandir	86.4%

PROJECTS

HealthLink - Smart Health Management System

[Jan '26 - Mar '26]

- Designed a 7-service microservices architecture (FastAPI, Docker, Azure) orchestrating 4 independently-scalable LLM agents via HTTP
- Built a RAG pipeline (Gemini embeddings, Pinecone, LangChain) grounding symptom extraction in a 500-entry medical knowledge base
- Implemented a multi-agent contract (Pydantic schemas) so symptom, doctor, scheduling & summary agents chain structured LLM outputs
- Hardened the API gateway with prompt-injection detection, input validation, PII-masked logging, and rate limiting for the GenAI system
- Automated CI/CD with 7 path-filtered GitHub Actions pipelines building Docker images to ACR, deploying to Azure with SHA-based rollback

Inventra AI-Driven Weather-Aware Financial & Inventory Management System

[Apr '26 - Jun '26]

- Architected a stateful multi-agent LLM system (LangGraph, 4-node flow) orchestrating 3 agents for automated inventory and financial decisions
- Designed structured LLM parsing (JSON-schema intent classification + regex fallback) for reliable query routing across the agent pipeline
- Exposed the agent system as a custom MCP server, enabling Claude Desktop and other MCP clients to call inventory/finance tools directly
- Built a tool-calling agent (LangChain + Gemini) invoking a live weather API mid-reasoning to ground reorder and inventory recommendations
- Developed a Streamlit conversational UI with natural-language queries, JSON/CSV outputs, and audit logging for explainable recommendations

HireFlow - Intelligent Candidate Search and Evaluation

[Jun '26 - Jul '26]

- Built a Hybrid RAG pipeline fusing BM25 with 384-d Pinecone embeddings using RRF (k=60), improving candidate retrieval recall by 35%
- Engineered Gemini 3.6 Flash re-ranking with weighted scoring, skill bonuses, and gap penalties to compute 0100 fit scores with fallback
- Built intelligent query routing with LangChain RunnableBranch + Multi-Query Expansion, reducing retrieval latency by 40% via adaptive search
- Evaluated end-to-end retrieval quality using the RAGAS framework across 4 metrics (answer relevancy, context precision, faithfulness, answer correctness), achieving 92%+ context precision

INTERNSHIPS

Full Stack Developer Intern | Local1 | Localstack Pvt Ltd

[May '26 - Jul '26]

- Built Cross-Platform Mobile Apps: Developed two interconnected React Native applications (Customer and Owner facing) using Expo, ensuring smooth performance across both iOS and Android
- Engineered Location-Based Services: Implemented geofencing and real-time location tracking using expo-location to match users with hyperlocal deals and nearby service providers
- Developed Vendor Tools: Built a comprehensive vendor dashboard allowing shop owners to upload KYC documents, manage inventory, create discount campaigns, and preview their storefronts in real time Integrated Native Device Features:
- Utilized native device capabilities including expo-image-picker for vendor catalog uploads and react-native-view-shot with expo-sharing to generate and share custom QR codes

POSITIONS OF RESPONSIBILITY

Web and Media Team | Teamtrak | IIT Kharagpur

[Feb '24 - Oct '24]

- Pioneered digital presence for India's premier student railway research group under CRR, IIT Kharagpur, establishing the team's public-facing brand and technical repository
- Collaborated within a 25+ member cross-functional engineering team representing IIT Kharagpur at the prestigious international IMechE Railway Challenge
- Developed a fully responsive full-stack platform serving 1,000+ monthly visits, interactive UI components

EXTRA CURRICULAR ACTIVITIES

Resolved 50+ day-to-day resident grievances related to infrastructure, mess, and maintenance, coordinating with hall authorities to ensure timely redressal
Represented school in table tennis, competing up to the state level in Maharashtra

SKILLS AND EXPERTISE

•: Pandas | NumPy | Apache Superset | Matplotlib | Seaborn SQL | ChromaDB (Vector DB) PyTorch | TensorFlow | Scikit-learn | FinBERT | Word2Vec | FAISS | LangChain | HuggingFace Text Classification | Embeddings | RAG | Fine-tuning | Sentiment Analysis | Named Entity Recognition Git | Streamlit | Hugging Face Spaces | VS Code

COURSEWORK INFORMATION

- UG Courses:** Programming and Data Structures | Linear Algebra | Advanced Calculus | Transform Calculus
- MOOCs:** DSA | OOPS | Probability | Statistics | Machine Learning | Deep Learning | Operating Systems | Computer Networks
